

## Project Design Phase-I Solution Architecture

Date	29 OCTOBER 2023
Team ID	NM2023TMID05991
Project Name	FARMER INSURANCE CHAIN

### Solution Architecture:

**Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:**

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

### Example - Solution Architecture Diagram:
